Green Energy

Michael McDonald (brought by Edwin McCain)

Friday, April 18<sup>th</sup> at 10:30 am

GreenEnergy Global installs and services intelligent lighting / energy management systems

They are not a manufacturer / they buy the lights and sensors from suppliers in Boston & China

They are a technology reseller

Their system works wirelessly and senses motion, records motion patterns and learns these patterns to alter the amount of light needed. This saves energy.

Installing in Charleston at Chevron also have worked with 3M and Amazon at their KY distribution center.

Are considering opening an office in Greenville.

We discussed manufacturing in South Carolina and the benefits of that.

Follow-Up-

Virtually introduce them utilities providers who have programs to work with their customers to reduce their energy consumption. (Jennifer will do this)

**Jennifer E. Noel**
