---

Mr. Dave: I appreciate your attendance here in Dorchester County yesterday. Hearing earlier that you were not coming/attending I was a bit upset knowing that this was history being made in South Carolina and what a large benefit for our taxpayers. When you spoke to me after the program I was relived and very pleased that you did come.

The article in the paper was good but you got something incorrect at the last. I informed the public that Rep Young and Rep Converse Chellis wrote off on this bill. Rep George Bailey didn't have anything to do with this one. I was very surprised that he waved around his tax bill wanting to pay. If possible I would appreciate some type of correctness on this if at all possible. The credit needs to go to the proper person.

Thanks again for attending this program. We do need good/positive news as well. There has been many hours and dedication applied to this project. This was a vision of SCATT's (South Carolina Auditors, Treasurer's and Tax Collectors) back in 1996, but due to the lack of the right computerization in most counties and the DMV state office, and no law to cover the process it was not workable. ONLY thru the tremendous interest and dedicated efforts of Marcia Adams, Executive Director of DMV, these five pilot counties came forth and this project became a reality on June 1, 2005. The DMV staff and ours in Dorchester County worked diligently for the past month and on a time line to put this in production. This was only after many months of broad thinking/brainstorming in all areas, looking at all exceptions, ending with designing the form workable for all DMV offices as well as all the county offices. Mr. Jim Early, with DMV is the responsible person keeping us all together and on target. A BIG thank you goes to those included in this project; DMV, the five county treasurers, our software vendors and county programmers.

Again thanks for your attendance.

Patsy G. Knight
