

**Petition for County Water in the Bethesda Community, Williamsburg County  
December 2015**

We, the concerned residents of the Bethesda Community submit this petition for county water. In the wake of this year's historic flood, existing concerns about the safety of the well water that the residents of this community depend on resurfaced. Several community residents are concerned because their well water has tested positive for dangerous bacteria, and others have expressed concerns and suspicions about the safety and quality of the water in their wells. Water is a vital substance and basic necessity, and it is imperative that we, the tax paying residents of this county and community, have access to safe, clean, healthful life sustaining water.
