Subject: IS CHELSEA'S APARTMENT A LICENSED MEDICAL FACILITY ???

If you look up the address, it is just as this says...Metro Home Services, however...looking it up under NY [Health.gov](http://www.health.gov) website, it says it closed or merged...(yeah...yesterday???) . Regardless, it is Chelsea's address...4th floor and all...

### **Is Chelsea's Apartment a Licensed Medical Facility?**

VANITY

Posted on **9/12/2016 7:25:15 PM** by **TigerClaws**

A Presidential candidate collapses at a ceremony in NYC...and is shoved, unconscious, by SS into a van like a side of beef and rushed off...not to one of the many world-class hospitals and clinics nearby...but to her daughter's \$11M apartment.

Sound odd? It did to me.

So I looked up a bit about Chelsea's new apt.: THE WHITMAN, 21 EAST 26TH STREET, 4 - FLATIRON DISTRICT, NEW YORK

Real estate listing on her apartment:

<http://www.elliman.com/new-york-city/the-whitman-21-east-26-street-4-manhattan-uehbvqr>

I discovered that it exactly shares an address with:

METROCARE HOME SERVICES, INC. 21 East 26th Street, 4th Fl New York, NY 10010

SAME address..SAME Floor...only One Apt. per floor.

For a woman very secretive about her ambiguous medical conditions...whom avoids hospitals like the plague, it occurred to me that when the Clinton's bought this incredibly expensive apt. for their daughter in 2013...they may have also purchased it with the intent of using it as a secret private medical treatment facility for Hillary to use during her anticipated campaign.

To the press...it would only appear Hillary was just dropping in for a visit with her daughter...when, in reality, she is receiving medical treatment and controlled substances from private physicians and private pharmacists...on private property (no need for disclosure).

If so, Chelsea's apt. served it's secret purpose flawlessly this Sunday.

It makes sense that to establish a clandestine medical treatment facility in a residential apartment--one which is legally compliant with the controlled substances dispensing/stocking/delivery & shipping requirements...and one which is able to legally supply and treat a private patient with the drugs needed, one would also have to register the address as a medical treatment facility.

In this case, I would assume the Clinton Foundation would be the controlling entity.

A staff (and private) doctor or pharmacist would then be employed (Hillary has two) to legally treat the patient, practice medicine within the confines of the private residence...and dispense drugs to that private patient without any disclosure.

This sham medical facility, while legally registered as a public care facility...would also have to be closed to the public in order to operate without any disclosure.

THIS is exactly what appears to be taking place at 21 East 26th Street, 4th Fl., New York, NY.
