Subject: fixing roads

---

Hi Mr. Bryant,

Hope you are enjoying your new position, miss you in Anderson County! I know there is a lot of talk about fixing the roads by increasing the taxes--I agree this is not the answer. Living in Anderson near the lake, I know there are MANY boat trailers and utility trailers on the roads. Why can't trailers be required to be licensed as in other states, charge a reasonable amount to register and license each one i.e. \$25 (or whatever amount would be profitable to the state but reasonable to consumers) and use the money to fix the roads? It would also provide a way to track stolen trailers by having a way to ID them. Other states require boat, utility, jet ski trailers, etc. to have license plates on them which are purchased in addition to vehicle plates. I just think that it might be a good way to raise money. Thanks for listening.
