This is just disgraceful! How this company stays in business is beyond my comprehension! We have lots of eyes and ears in Tega Cay now and I want to tell you how thankful we are for them. Did this spill get reported? Please notice that the sewer overflow is running into Lake Wylie again. Also note that the lid is not seated properly which poses a real danger. Please let me know what else we can do beyond reporting these spills.

On Another note, the # 3 lift station is a constant problem with someone working on it weekly. I can only guess they don't know what they are doing. Remember they were putting in a submersible pump; well, I guess that did not happen either. As I reported, they were here until 1:30 am a week ago with all the sounds of the trucks and workers helping to keep neighbors awake.

Please help us get this company out of our city and put a competent company in here.

Linda Stevenson

**Subject:** Sewer issue

Hey Linda  
I took these picture over the weekend (Sat 3/24/12) while playing golf.  
They were taken at the back of the green on hole number 8 of the Grand View.  
You can clearly see the discharge flowing down into the lake in the background.

Didn't know if you were already aware of this particular spill, or if these picture help your cause.  
That sewer has been like that for as long as I can remember, you can get pictures of it any time you want!

Best Regards
