## South Carolina State Parks

at 12:20:00 on 4/28/2016 UTC · 🌐

MANY THANKS! Joshua Caughman, Lee County Clemson Extension Program Assistant and local naturalist has been busy planting native plants in Lee County to help support pollinators. This Saturday, he dropped 3 species of milkweed and purple coneflower off at Lee State Park's Education Center. The park rangers will grow these seedlings into mature adults, collect the seeds and grow more next year to support our pollinators. We appreciate what you're doing, Joshua!
