Proviso 117.131: Energy Efficiency Repair and Related Maintenance

Background Information:

- The FY 2014-15 General Appropriations Act appropriated funds to each college and university for the purpose of conducting an operational and performance review to improve the efficiency, value, and performance of each institution.
- A 13-member steering committee never produced a report or complete set of recommendations; this proviso allocates the funds originally intended for performance audits to each institution for energy efficiency improvements.
- Given that the committee produced no recommendations, funding for the program should lapse to the general fund – not reward universities for **not** undergoing performance audits.
