Preventing Data Breaches Through Proactive and Persistent Monitoring

One of the most important lessons you can learn in 2016 is how to protect your organization from the possibility of corporate identity theft. The question of the hour is, **how do you monitor cyber threats to mitigate your organizations' risks?**

Learn how to proactively and persistently monitor your IP addresses, user accounts and supply chain for potential external threats with the right solutions to fit your organization's needs and better your overall cybersecurity posture.

Join Kevin Lancaster, ID Agent CEO, today, March 2, 2016, at 1 p.m. EDT, as he discusses:

- How to effectively monitor the Dark Web to detect potential threats
- Monitoring your supply chain and third-party vendors for vulnerabilities
- What "actionable threat intelligence" is – and how to actually take action!
- Protecting your employee base from cyber risks
- Major upgrades to the Dark Web ID monitoring platform
