Subject: Heads up

All,

An opportunity recently came up regarding an executive management position with Luzerne County. The position is the Director of Budget and Financial Services, which handles all of the budget and financial activities of the county such as budget formulation, accounting, and treasury functions. I was not actively looking, but when the opportunity arose it made me realize how much I missed public service.

I haven't officially accepted the position yet, but I have gone through the whole process and they are in the final stages of background checks and reference checks. In the past you have said I could use you for a reference, so I used you for a reference. Not sure if they will contact all of you, but I wanted to give you a heads up in case you get a call.

Thanks,
Rich
