Subject: Re: SAVE OUR JOBS

Dear Governor;

I am writing one more time to you. By the way, I haven't received any responses yet. Below, you will find the email that I just sent to Lonnie Carter. I ask you again, please, please help save our jobs.
Thank you, Lanita Coley

Dear Mr Carter,

As I appeal to you again, please help us to save our jobs. If you have made your plans based on the aluminum market, that was a bad choice to make. We are a commodities market which means that the price of metal fluctuates quite often, we adjust accordingly. However, the decisions being made now is not based on the metals market, I don't even think that it is based on the power; I think it is much bigger than that. And so far no one has been willing to work with Century at all no matter what suggestion has been made.

I appeal to you on behalf of the 600 employees and families that have no voice in this matter. It isn't about Century, nor is it about Santee Cooper. It doesn't matter who is the better negotiator, it doesn't matter whose personal feelings are on the line. It matters about the 600 people, 600 families that are out of a job because those that we trust to be able to work together, can't seem to get that done. It is about the 600 employees that have to wake up Christmas Morning and face their families without a job. It is about the 600 employees that maybe can't afford Christmas this year. It's about 600 employees that will have to settle for less paying jobs and won't be able to provide for their families the way they are accustomed to. I myself have to face some of these issues.

I know in my heart, that this isn't about power at all, it is someone else's political agenda. I don't know how nor why, I just know that is much bigger than a power deal. I ask you, would you want your son or daughter, your Mom or Dad to be caught up in this issue? Only you know what the real issue is as no one has shared. Think about your family and how you would feel if this would happen to them and they be caught between a company and a state owned agency.
How would you feel if they lost their jobs for this unknown reason?

Please, please help us save our jobs. Give us our future back, step into the "Man of the Year" title you were voted for and show us how a true man of the year would respond.

Thank you for the consideration, Lanita Coley
