Think Emergencies Just Happen to Other People?

[_<http://hughesbusiness.hughes.com/rs/hughesnet2/images/franchise2-divider.jpg>](http://hughesbusiness.hughes.com/rs/hughesnet2/images/franchise2-divider.jpg)

Dear Nikki,

Unfortunately, none of us is immune to disaster. But you can be prepared in case a hurricane, earthquake, tornado or other disaster disrupts your network.

The **good news** is that satellite technology provides an **alternate communications path** when **terrestrial wireline and wireless networks are hit** with disruptions or outages.

In fact, satellite is the **only true alternate communications path** That's why your agency needs a satellite-based Hughes COOP Solution
<<http://pages.myhughessolutions.com/b0000uMjrVE0A92j000Zk1F>> for 24/7

network reliability and availability.

Designed for Emergency Preparedness

- True path diversity with **cost-effective satellite broadband backup**
- **Complement existing terrestrial networks** for up to 99.9% availability
- **Emergency Internet access** with nationwide broadband service and vehicle-mount terminals and flyaway kits
- Policy-based routing with **automatic failure detection** between primary and backup links

Critical Communications in Disaster Areas
