Put together backgrounder that includes letters we've sent, media avail she did on it, and let's see what that looks like. We may need to also put him on the phone with Glaccum.

Subject: Question from The Sun News

Chaney,

I am a reporter with The Sun News in Myrtle Beach and I am working on a story about local farmers trying to recover from the October flood. I have read various reports about the governor's position on accepting federal aid for farmers. I know the governor asked the U.S. agriculture secretary to expedite crop insurance payments to farmers, but I have read that she has not requested additional funding that is available. Can you explain what her position is? You can reach me via email or at (843) 626-0218. Thank you.
