Subject: Roads

Last December I hit a pothole that blew out front and rear tires on driver's side and bent the expensive rims.

Total damage \$2000 including towing and loss of use for two weeks.

Do you think I am worried about a gas tax increase estimated at \$60 year?
It will be 33 years to reach \$2000 at that rate.

If it was not for the cars stability control system, the car would have veered into the passing lane and been rear ended by a passing 18 wheeler and maybe a fatal accident for us. .

As the top companies are advising, stop all the resistance and raise the gas tax and fix the roads now PLEASE

Otherwise I will have to move to a state that cares for the safety of its drivers.

Sincerely
Thomas Pauken
