**Subject:** Re: Available for a call?

Nikki,

Good morning! I wanted to check back in and see if you would be interested in discussing how our patented gel comfort mats can help your employees reduce fatigue and improve productivity.

What works well with your calendar to have an intro call to discuss the many benefits of their use?

Best,

Lori

Nikki,

As a government agency, you not only care about public welfare but that of your employees, too. You may have workers who must stand as part of their job, or maybe they use stand-up desks for their health. Either way, they likely experience fatigue and discomfort as a result. This you can't prevent, but you can help. Research shows fatigue from standing for long periods can be reduced by 40-50% by using a comfort mat. Less fatigue = improved morale, smiling faces, happy feet = Agency success.

I'm with GelPro, an Austin company creating the highest quality comfort mats on the market, all proudly made in the USA. We have been featured in the New York Times, Wall Street Journal, and USA Today, and we are the only company in the world that has a patent on gel comfort mats. Whether you'd like to try gel or foam mats, there is a best fit for every type of work environment. All of our mats combine durability, comfort and support to prevent fatigue and improve morale, and this is why we have a best in industry warranty on all of our mats.

If you are interested in hearing more, or if you believe someone else from your organization might be a better fit, we would love to share why (beyond all this) we would make a great partner. Working with government agencies is not new for us (GSA Contract #GS-03F-0031Y)!

What works best with your calendar for a call this week or next?

Looking forward to it,

Lori
