Subject: teachers

---

You are right just money is not the answer. I think the incident at Spring Valley set us back more than people will admit. When a student can tell a teacher, administrator, and SRO "I am not going to do it". Also others hold this student to be a hero. I will agree with one thing sheriff Lott said. If the student had complied with the teacher we would not be here today. Who wants a job that you put your life and health on the line every day. Also no support from the community.
