Subject: Michigan Cyber Range

Good morning.

Attached is a cover letter and backgrounder regarding an opportunity that Governor Snyder would like to offer your administration relating to cyber security. Both he and fellow co-chair Gov. O'Malley take their responsibilities for the NGA Cyber Committee very seriously and have pledged to assist their fellow Governors in anticipating and preventing cyber security breaches. Michigan has developed a cyber-range which your administration's IT experts are welcome to use to help protect the country from these pernicious and continuing attacks on our intellectual property. Testing protocols will allow you to increase awareness and assist your CIO in avoiding these unfortunate events.

Please see the attached letter and backgrounder for further information. Feel free to call if there are questions that we can answer. David Behen, our CIO, is more than willing to share our range and assist any Governor in the country in this effort.

I look forward to seeing you at the next NGA event.

Dennis C. Muchmore
Chief of Staff
Governor Rick Snyder, Michigan
