Elaine -- can you give me an update? David -- please forward information on the backlog as soon as possible. Thanks.

I provided Elaine with the RFP material I had for cleanup and issuance of a new RFP. I don't know where that is? I still encourage the concept!
The backlog is still there as far as I know. Don't know what it is. My staff tells me that the data entry staff will not provide backlog info. to anyone but David Burgis.

Where are we on this? I know DMV was going to try to work on the backlog while the new screens were being implemented and Elaine was waiting on a scope of work so we could do an emergency RFP to see what our outside options were. Can someone tell me if we're still as far behind in entering this data as we were in our meeting or if the scope of work is finalized? Our federal funding for STP is at risk and Colonel Amos has a gun you know.
