

Governor Nikki Haley, South Carolina State House, Columbia, South Carolina Feb.8-15

Dear Governor Haley-Regarding terrible chemtrails & their poisoning of our atmosphere.

What about the farming industry in South Carolina, it cannot survive without the sun.

Global Warming is a Hoax and Chemtrails is also a Hoax as any 5th grader can figure out. No, they're not aliens from another planet but they are a hostile force.

They blame pollution for global warming while actually pollution defuses the sun and makes the earth colder. Chemtrails adds more pollution and more diffusing of the Sun, making the earth also colder. They were spraying here this week when it was 21 degrees. China cleared their air of pollution for the Olympics by shutting down all their coal-fired manufactures for that period of time. We are grossly misled in that this chem-trails attack on our breathing because it is generated from falsehood and not from any truth or reality. If they are claiming they are trying to reflect the sun's rays back upward to make the earth cooler and combat global warming they are delusional and they will destroy all the life on earth that is fueled by the sun's rays. In Alaska where the sun shines 24 hours per day in the summertime flowers grow to double the size they do here on the mainland. They are spraying reflective metals dust supposedly to reflect the sunlight and it will damage both man and animal. The cost of their spraying is bound to be billions of dollars per day so they must have an unlimited source of funds that could only come from their own private corporate Federal Reserve which is unaudited via the Pentagon. Such funds never appear on any budget that is published. I believe you have the right to question their authority

Who are they? They are what is known as the establishment and their traitors in Congress known as the neo-cons. They are the bankers who are the money lords of Wall Street and warmongers tampering with God created nature and candidate for God's prophecy wrath.

Study Fritz Hollins confession in retiring the Senate saying who he took money from. I am writing to you once more because I have discovered much more vital information on the chemical trails including a project underway to publish this outrage of 'Chemtrails' on many billboard signs nationally as is described by the website geoengineeringwatch.org One billboard sign I believe in Oregon stated that "Our government is poisoning our air".

I notice increased dust accumulation in our home with the increased chemical trails! I also wish to clarify my previous statement that these planes sprayed over head all night because the sky was a smooth artificial overcast the next morning and because they were spraying at sundown the night before like an entire army of hostile forces to shut off our sunlight with this hazy milky cloud cover. Normally our sky is clear by the next morning and that could have been misunderstood as being natural clouds when it was chem-trails. Normally I do not see the planes up by 8:00 a.m. But this particular morning on February 4, U.S. "Air Force" planes were flying in formation spreading their poisonous chemicals in overcast atmosphere. I reiterate that I believe these planes are flown by remote control the same as U.S. Predator Drones are flown killing people indiscriminately in the Middle East. There is going to be a lot of kids suffering from the poison chemicals until they die.

<These are my opinions> Gardens do not grow without sunshine! Honey bees are dying. On Thursday February 5, 2015 it was clear all day with no spraying maybe because we had extremely high winds and except for some chemical trails left from day before in the early morning, the sky was clear and beautiful all day but early Friday morning February

6 all hell broke loose with the craziest spraying I have never seen and it lasts all day until the sun was obscured and the skies were crazy hazy overcast and looked like a big mess. The assault continued until dark and Saturday morning February 7 I see these white trails like a grid far off in the western sky still developing and coming closer by every minute. The sky looked like a war movie dog fight of streaming trails going in every direction.

After a long rain it is clear today with sunlight in my window revealing dust particles floating in the air and settling down on my computer screen must be from chemtrails. This is a tragedy and bigger than life for me to describe. Why should I take pictures of these blooming streams when these hostile chemtrails look the same all over this country, even the universe are posted on the Internet already if you will take time to view them. I fear for my family and myself knowing that civilization is in grave danger of being wiped out by these "poison Chem Trails". Even if everybody puts on a gas mask the resupply of oxygenated breathe air must come from the outside and people's breathing air will need to be filtered day and night but still, in my opinion, the lungs would become saturated & die.

It is unChristian for U.S. to be rebuilding the Berlin Wall on the Mexican border. The president has power to stop this with a presidential signing order and I urge you to press this issue with the U.S. Environmental Commission to stop this outrage of insanity. This can only be properly described as suicide for America without the people's consent. Being a Republican you would know that global warming is a hoax with the exception of George H. W. Bush signing the extreme tax on freon putting the poor in a worst struggle. Chem trails are certainly a secret deadly hoax endangering all life on earth for no reason.

<http://www.geoengineeringwatch.org/chemtrails-raining-poison-from-the-sky/>

Chemical companies are making a ton of money importing and supplying this material. Please make sure that none is permitted through the Port of Charleston such as Barium Chloride in large quantities. One comment on the above Website suggest that this may be where trillions of dollars disappeared to from the Pentagon in the last few years and that's probably true that they are spraying us in secret and off the book's clandestinely. Another comment on the above link states that a person living in L.A. seeing chems increase every day moved to Thailand but now is seeing chemtrails increased there to a frightening level. A person commenting in the above link said if you take a flash light outside at night and shine it you can see these tiny particles raining down on us from the sky, that is terrible.

Flu shots are the biggest scam of all giving many people Gillian Barre as a result. Gasoline prices are now going back up since the death of the king of Saudi Arabia. They raised gas 20% in one day here. This increase is devastating to the poor population of this country. When 2 or 3 traders on Wall Street can determine the price at the pump for all to pay. The poor suffer from tax increases and cost increases every year while making less money than the year before. The rich could care less what gasoline cost to them it's trivial. With the high-cost of spraying the atmosphere in terms of jet fuel and cost of chemicals to propel them to such a high-level is more money than even the federal government has most likely and may be why diesel fuel is much higher than gasoline here on the ground. The people of this state need to be informed on this critical chemtrails issue, they need to hear from you and the federal government the truth as to what is happening and who is paying for this elaborate project. We see Republicans are not willing for the rich to pay.

We may have all the education in the world but if we miss this catastrophe we may choke to death and the American people will be the smartest people of the terminal graveyards. It seems to me this is mutiny and we are all looking to you for answers in this great state. This is some of the same stuff like fluoride from aluminum manufacturing waste products they have been putting in our drinking water for 40 years and some of the same stuff as is mercury they put in child vaccinations known to be causing autism, wasted lives by much suffering of the human race yet nothing seems to be able to stop them and certainly not the 'truth' will stop profiteers from racketeering on human misery. No one suffers more than people with breathing problems yet the nicotine habit keeps on rolling as the people smoking continue to ignore the warnings that smoking causes lung cancer. Then we have the chemotherapy another deadly chemical being marketed to the sick & dying for cancer. Fracking for gas and oil is another means of poisoning the groundwater and the people. South Carolina has been a dumping ground for nuclear waste for more than 50 years and that is a tragedy. If you will notice the cancer rate increases dramatically along Savannah River basin in this state. Nuclear waste last forever and is risky to transport even more so than the chlorine gas used to purify water and did kill people near Aiken in a derailment.

So many people are broken out now with a mysterious rash believed to be chemtrails. Glen Beck was quoted on Meet the Press today as saying the measles vaccinations are a hoax and I agree with him on that issue knowing it is just another false flag to vaccinate the people especially the children and all these vaccinations seem to have the same basic ingredients including Mercury that reportedly destroys the brain. Rick Perry for a \$5,000 donation from the pharmaceutical industry signed the Texas young girls Vaccination Act which is reported to have many terrible side effects and is unproven to prevent cancer the same as fluoride is unproven to prevent child cavities being a cash cow for the racketeers. One mother shown on television today said if government can decide to vaccinate your children then the government can decide what your children can eat or not eat. I agree.

Suddenly so many people have shingles after they began advertising their vaccine. It takes more than just labeling risky processed foods to save the people with Monsanto genetically modifying everything that grows for our consumption to give them monopoly. Capitalism is not what I thought it was in growing up and hoping to be a proud capitalist. Survival is now becoming the most critical issue to be considered for a citizens longevity. Violent storms have hit 3 states on the northwest coast and many blame chemtrails for the violent weather. Southern California is plagued with their worst drought in history. Some blame both chem-trails and HARRPS program in Alaska for altering the weather causing this phenomenon. Meanwhile they report last year being the warmest year, unbelievable. Nobody can believe the government would be party to such a deadly conspiracy but it happened to the people of Russia in 1917 and kept secret under 'Bolsheviks revolution'. I cannot imagine people who would go against better judgment just to make money and risk lives but there are those people in control and some call them reptilians as opposed to human beings. If they are trying to control whether they're doing a good job of messing it up if you look at Boston being hit continually by major snowstorms this year appearing to be much worse than the weather was when I was in the military up there some years ago. Spraying the atmosphere has become the world's largest industry and no doubt the most profitable ever with those hands in the pockets of the taxpayers where working men and women pay higher taxes while the rich continue to make more money and pay less tax.

There is a true saying that a person can live 30 days without food, 10 days or so without water but only 5 minutes without oxygen or breathing. We face a severe crisis in this state and nation with massive and nonstop spraying of poisonous chemicals in our atmosphere. This is anti-God and anti-Christ by changing of God's natural creation to some man-made system of risky experimentation. I started painting art spontaneously 25 years ago as I felt impressed to paint the Book of Revelation. The South Carolina State Museum has 8 of my paintings in their permanent collection and one size 10 by 12 ft. shows the history of South Carolina entitled About South Carolina going back to the 25 Indian tribes that did occupy this area before we the Protestant Christian pilgrims came over to escape the big persecution of the Church of England and for a new life because of the potato famine in Ireland. The painting shows the Royal Navy firing on Charleston in 1778. I am honored to be chosen one of the 100 South Carolina artists of the 20th-Century by the South Carolina Arts Commission. I have a 7 Days of Creation painting commissioned by the American Visionary Art Museum in Baltimore, Md. and hanging in their permanent art collection. These are the times I have felt inspired to paint about the "Apocalypse" when the sun and the moon will fail to give their light. I never dreamed it would happen in my lifetime. Everything we need to know about modern misery is in Bible prophecy. Yet the hope of salvation by faith is real and I believe God expects us to express our convictions. I did paint the Book of Revelation 300 ft., it has traveled across the country being shown. I painted another shown in London, Paris and Campus Crusade for Christ in Switzerland.

Pollution is biodegradable but aluminum particles will clot the lungs permanently. All my life I have heard fear of what might happen and for the last 13 years we have all heard nothing other than Arab terrorism but the threat to the American people and the free world today seems to ultimately be Chemical Trails poisoning the atmosphere and we are trapped in a fishbowl without clear, clean and pure air to breathe. If this ever expanding secret mysterious industry is not stopped by the end of your term, I believe you will have a very sick state of people with damaged lungs, with cattle dying as we are already seeing the birds and fish dying mysteriously for a number of years now. May God enlighten you and give you strength to combat this serious problem that could destroy future mankind.

After a 24 hour rain today Feb.10 a beautiful blue sky all day until dark and no trails. Some years back I visited the art show at the Honolulu Zoo and noticed one artist in particular with his art work hanging on the fence and I purchased one of his beautiful paintings. I was proud of the painting but what he told me was worth much more and that was that if we all had unconditional love for one another there would be total peace and harmony in the world. I went to my hotel room immediately and painted just the 2 words Unconditional Love on a canvas and everyone that saw it was touched by it. This could solve the world's problems. I pray God to deliver us from this hostile chemical spraying.

And yes they will return the second day after the rain to continue spraying poisons. I respectfully request you to inquire of the Federal government a Chem-trails explanation to make this program public in the so-called free press of what is going on and report it to the people. You should demand the same answers from our Washington representatives.

Sincerely-William Thompson, 106 DuPont Drive, Greenville South Carolina 29607

Same as chemotherapy <http://truth11.com/category/government-poisoning-of-citizens/>
