Putting that table together - do you have a slide you want me to fill-in or are you going to do it around the data?

Here's my quick math. Highlighted ones in yellow arguably aren't zeroes. Just noticed that Becca marked the lottery ones as recurring, which I'm not sure is what we should have said, but whatever.

Josh, when you get a second, do you mind doing a little table that shows this vs. prior years? (The count, recurring \$ vs. NR \$, etc.) Would like to include that in slides. Thanks.
