Subject: Bamberg School District No. 2

I talked with both of you at some point in the consideration of a bill to assist the Denmark-Olar School District (Bamberg 2). We are continuing to work on a method of providing the School District with a single school to replace all the existing schools. If you were to visit those schools, you would be motivated to do something.

We're working on a USDA loan and have devised a solution that funds the school from savings in the operating budget. It is close. It might be useful to have the Governor's office indicate support. Indeed, if this works, it may be of interest to the Governor in assisting with solutions to the problem facing the extremely low-wealth school districts.

Can we talk?
