**Subject:** Question about emails

---

Chaney/Rob --

As evidenced by recent FOIA requests by members of the media, Gov. Haley does not regularly use her government-issued email account.

- 1) Did the governor use a private email account to conduct government business? (If so, what kind of account was it? Gmail?)
- 2) If so, will she turn over those emails to the state archives?
- 3) If not, what has the governor done with those emails on her private account? Has she deleted them?
- 4) If the governor used a personal email account and deleted those emails, what law does the governor's office cite under state law for being allowed to do that, especially since these are records of communications by a public official?

I would like to get an answer by the end of business today.

Thank you,  
Andy
