This is a press release from Community Activist Jack Logan Foundet of Put Down The Guns Now Young People Organization in South Carolina. I blame South Carolina lawmakers present and past fot having conflicting laws in the books about murder and shooting someone in the back. No one can shoot another in the back is murder, but for law enforcement an officet can shoot someone who have committed a violent crime or the discretion of the officer . Lawmakers are too blame for such conflicting law in the book of laws causing both police and citizen to be confused. I want The Governor to appoint staff to look at all laws on the books to make sure they are not in conflict to another. 8643031030
