Description/Significant Features: Road 1306.11 (unnamed logging road) is a circa 1955 road that connects Roads 1306 and 1306.06, extending 0.36 mile northwest/southeast through the north-central portion of the project tract (see Figures 3.21 and 3.22). Road 1306.11 is an earthen road that averages 15 ft wide and 20 ft amsl elevation. The roadbed is at ground level.

Alterations (include date(s), if known)

Architect(s)/Builder(s):

Historical Information

Historical Information: These investigations identified 14 roads associated with Watson Hill's logging era, circa 1925-2006. These include seven historic roads (Roads 1306.08-1306.14) and seven non-historic roads (Roads A-G). These roads were developed by logging enterprises in the early to mid-twentieth century to facilitate silvicultural activities at Watson Hill.

Road 1306.11 is shown as an unimproved trail on the USGS (1959, 1980) topographic maps but the USGS (1957, 1973) aerials show it integrated into the logging road network.

Source of Information: USGS 1957, 1973, 1980
