Good day. You may have heard from your Department of Defense representatives that there have been changes made to Wide Area Workflow (WAWF) this past quarter. WAWF, the DoD's mandated invoicing platform, has been renamed to iRAPT, or Invoicing, Receipt, Acceptance and Property Transfer. It has been combined in an eBusiness Suite, along with EDA, MyInvoice, and a handful of other useful applications.

WAWF eBusiness Suite Version 5.6 has significant updates to increase efficiency and enhance the user interface.

The Federal Government Receivables and Research Bureau (FGRRB) has authored an iRAPT/WAWF Detailed Training Manual which has received extremely positive feedback from the hundreds who've used it. Due to the significant changes we have totally re-written the manual and are offering it for sale.

Click the button below for full details on the iRAPT Detailed Training Manual. Please note where we offer discounts for larger quantity purchases.

For additional information, please email or call me.

Thank you.
