I am writing on the behalf of the SCDC inmate population. I have a request and suggestion, that there be an authorization of video game systems, as well as video games, to be stocked for order from canteen, to go with television stocked for order on canteen. [Blu-rays, DVD's, and all that stuff] I believe it may be beneficial for SCDC.

I figure more people will occupy their time on the game system and less time getting into "trouble." I figure it will be therapeutic on their psychi, helping them cope with their lives by focusing on (an) artificial one(s). I figure it can be fun and help give back to the community. Plus it may satisfy certain interests simulationally, thus reducing risks of pursuing the uncatified interests, like fantasy rape porn statistically reduces rapes.
