

NUTRI FUSION™

*Adding a little bit of goodness to the foods
you love!*

Executive Summary

- NutriFusion™ has learned how to keep fruits and vegetables from losing their nutrients!
- From this, NutriFusion™ produces GrandFusion™, a nutrient dense powdered ingredient from fruits and/or vegetables, to significantly increase the nutritional profile, and therefore the marketability, of food and beverage products.
- GrandFusion™ does not affect taste or functionality of the products it goes into and is 100% natural, non GMO, gluten free and uses only organic produce.
- In certain products, such as baked goods, it can extend shelf life due to the high levels of anti-oxidants (both from vitamins and polyphenols in the fruits & vegetables).

GrandFusion™ Benefits

- 🍏 High Nutritional Output: Retains the phytonutrient values from fruits and vegetables
- 🥦 Shelf Stable
- 🍏 Processing Stable: Withstands heat or cold with no or minimal degradation
- 🥦 High Bioavailability: Plant derived nutrients are more fully absorbed into the human body than synthetic vitamins (100% vs. 10%)
- 🍏 Convenient: Simple and convenient method to add the nutritional value of fruits and vegetables into food products, without altering the consumer's eating habits

NutriFusion™ is unique: a rare opportunity to allow profits and social responsibility to work together!

Research Shows:

“Better for You” products account for increased market share and profits verses traditional foods:

- Better sales growth (70%)
- Better operating profits
- Better operating profit growth
- Better shareholder returns
- Fruits and vegetables are recognized as the top functional foods. Nutrients from NutriFusion™, fruits & vegetables, provides a high amount of antioxidants to help the America’s deficient diet and health.

The Opportunity:

- Sell and market “Better for You Foods”: While improving claims, marketability, and profits.
- Add in Social Responsibility: Actually make a health difference for your customers.

The Phytonutrient Gap in Our Diets!

- American's consume large amounts of processed foods due to their many advantages!
- ***However, the nutrients are lost due to modern day processing!***
- Consumers do not want to change their eating habits but want food processors to provide healthier, “Better for You” foods.
- Only 21% of shoppers are satisfied that manufacturers and retailers are offering enough enhanced foods that provide benefits such as increased energy, improved memory, healthier hearts, or help prevent cancer.
- Consumers cannot be clearer in their growing distaste for “chemicals” in their food.
- Finally, synthetic nutrients are ineffective compared to nutritionally dense food sourced nutrition.

Our National Food Deficit ...

- "Only 6% of individuals achieve their recommended target for vegetables and 8% achieve their recommended target for fruit in an average day." (1)
- The CDC, the World Health Organization and many other international bodies feel the world is heading to a global health crisis due to poor diets! (1)
- Heart disease, cancer, and diabetes are assuming epidemic proportions. The number one reason is the lack of protective nutrients in our diets. (1)

(1) **National Fruit & Vegetable Alliance: Steering Committee Members:**

- CDC, Center for Disease Control & Prevention,
- American Cancer Society, American Diabetes Association, American Dietetic Association,
- American Heart Association,
- National Cancer Institute,
- USDA: (Food, Nutrition and Consumer Services, Research, Education and Economics, Marketing and Regulatory Programs).
- California Department of Public Health.

2 Ways to Use GrandFusion™

Replaces the phytonutrients lost to over processed foods such as fruit juices, baby foods, soups, & yogurts.

Adds phytonutrients that never existed in foods such as snacks, cereals, granola bars, & pastas.

Product Usage

- Food processors can significantly enhance the nutritional profile of a wide variety of finished food products
- Small amounts can be added to processed foods to provide natural nutritional equivalents to servings of fruits and/or vegetables
- Products containing negligible amounts of nutrients can become significant sources of nutrition
- GrandFusion™ allows all-natural health claims to be made in foods and beverages that people regularly consume without altering the consumers' eating habits
- High antioxidant levels in GrandFusion™ can extend shelf life of some products

For Professional Food Formulators

- 3 available blends of product: fruits only, vegetables only and fruits & vegetables combined
- Organic, Non-GMO, Gluten Free
- Mix wet or dry
- Nutrient scan/analysis obtainable at any lab
- Standardized nutrient levels for food products (e.g. 50% of DI at 225 mg) is deliverable consistently and easily verifiable

Where GrandFusion™ Can Be Used

- Breads
- Pasta
- Bagels
- Cookies
- Energy bars
- Pastas
- Yogurts
- Soups
- Baby food
- Cereals
- Sauces
- Beverages

- Powder drinks
- Salad dressings
- Breaded chicken
- Pumped meats
- Puddings
- Cakes
- Muffins
- Crackers
- Bread
- Cheese

- Chocolate
- Tortilla chips
- Tortillas
- Chips
- Hash browns
- Gluten free products
- Juices
- Protein Powders
- Protein drinks
- Popcorn

- Bottled Water (some taste and cloudy water)
- Vinegars (high acidity)

3 Types of Label Claims

(example based on 112 mg of powder/serving)

1. % of DI or RDA*

Nutrient	%DV	Label Claim		100% of Daily Value
Vitamin A	25%	1244.44	IU	5000.00
Vitamin D	25%	99.56	IU	400.00
Vitamin E	25%	7.47	IU	30.00
Vitamin C	25%	14.93	mg	60.00
Vitamin B6	25%	0.50	mg	2.00
Vitamin B1	25%	0.37	mg	1.50

3. Source Claims**

(Excellent source, Good Source, or Source)

FDA Approved Claims
Rich in Antioxidants Vit A,C,E
Excellent Source of Vitamin A
Excellent Source of Vitamin D
Excellent Source of Vitamin E
Excellent Source of Vitamin C
Excellent Source of Vitamin B6
Excellent Source of Vitamin B1

2. Fruit and Vegetable Serving Claims*
