Of course you did and I looked at every size sign from here to Florence and back and still can't figure out the best size. Although I do keep a tape measure in my car, I figured I shouldn't pull over on the highway and measure any signs. Maybe we can further discuss w/ DOT and they can give us a visual.

I thought it seemed a little big...I was thinking more like 30-36" by 18". I just passed along what you asked for.

I've pulled out a tape measure and it seems big. Thoughts? Maybe I just can't get realize in the context it's meant to be.

Christian

Please see the attached layout for the sign. One file is just a layout and the other has the dimensions. We used a 60" wide and 30" high sign with the legend height as follows:

SOUTH CAROLINA – 2.32"

WORK READY – 5.5"

COMMUNITY – 3.14"

These sizes were developed based on the proportions of the logo.

2013 – 2015 – 4"

This is shown on a white background.

Once we started with the layout, we noticed that we do not have many options. The reason we used the 60"X30" sign instead of the 60"X36" sign was the larger sign had a significant amount of blank space that could not be used without distorting the logo.

Please look at these and see if they are ok or if you have some ideas you would like to try. Also, if you would like to meet to discuss, please let me know.

Thanks

Tony

Here are the vector files. Let me know if you need anything else.

Thanks and Happy Monday!

I'm copying Elisabeth Kovacs at DEW – if she doesn't have it, she should know who does. Thanks.

Thanks! Would you happen to have the vector file for this graphic? With the vector file we can enlarge the image without it distorting and produce a better layout. In addition, this file will be need to help with the actual sign production once a final layout is approved.

Here's the logo. I understand they want to add "2013-2015" below it as well. Thanks again.
