Subject: Health Care Bill ~ Website email from Daniel Haggerty

Lt. Governor Bryant, I'll be extremely brief! Repeal Obamacare, defund Planned Parenthood, and remove the Federal government from health care beyond our traditional medicare/medicaid programs; and while you are at it, clean that mess up too! The Federal government has no business in devising a single payer system and I will not stand for it! If the states want to pick up that plan, that is for them to decide; with their taxpayers. The solutions to downsizing the Federal Gov't are there, you just need to get it done. Repubs-get on-board with our President or you will be replaced in 2018 and beyond. This is a conservative country, whether you are one of us....or not. This will cure all ills on the budget and the massive national debt. And getting every able bodied person off the dole and into the workforce will do the rest. What you have been doing for the last 60+ years is un-American and it must stop NOW! Daniel and Carol Haggerty
