

OUR Natural Resource of Electricity !!!

Honorable Governor Haley

Re: "Wasted Electricity Usage"

I was advised that only you can
correct the Wasted electricity
Supply & demand - that

to day is Caused by Washing Machines

"claimed" to be a "Water-Saver" Sensor
that only fills 6 inches of water
(for 6" Volume clothing) and

the only minutes choice runs
65 minutes of electricity

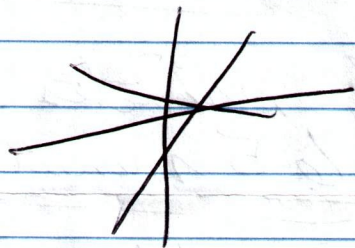

A Water-Saver that causes 6 times
the electricity for ^{same} Volume laundry -
is NOT a "Water-Saver", but a

Severe Waste of Electricity time.

For MCR Machines Washed in ¹⁰⁻20 min
electricity with 6" mod or Hi Water.

this "6 times" ^{+ elect.} for
Washing Home Laundry the
last 5-6 years has
caused demand problems
& overuse outages of
electricity in our
State & Nation !!!

(Has just now come to my
attention & learning

Laundry Washes by Volume
& Volume Water -

Not by "Sensor" Weight 6" ^{10"} max
≡≡≡ (Kernick's Deep)

Former Laundry Machines gave
a choice of
Water Saver (3 Loads)
and minutes elect. Saver.
also 11 in 10-20 minutes
"delicate to NORMAL."

Not only is the Elct. Company
problemmed with increasing
power stations + Resource that
is SERIOUS to our Natural Resource.

But homes must pay for
^{Surge} Water + 6 times the electricity to
now Wash their home Laundry.

I implore you to Return this
"Water-Saver" (not a Saver) - +
"elect. Waster" - back to our
Laundry machine choice levels
of Both Water Saver and
Electricity-Saver 20 minutes.
We did have.

Sincerely
Judith Gore
