Subject: Time to say NO to Islamic invasion

---

To: County Council  
Cc: Governor

Dear Council member,

The people of SC are groaning with sorrow, frustration and anger. Sorrow for the loss of an American life lost by a Muslim terrorist shooting, frustration at the insane policies by those who seek to force terrorists upon us and anger because many of us have already been warning about the dangers of Islam! I bring to you what is on my heart and mind as well as theirs.

Islamic Terrorists have infiltrated America as refugees, immigrants and border crashers. They have even been home grown, as is the case reported from California. They have one trait in common: they are all Muslims practicing Islam! A Muslim--born in America--has struck in OUR COUNTRY! How long before Muslims strike in OUR STATE or OUR community?

Islam is NOT the religion of peace. Islam is the religion of subjugation! To all who are not Muslims.

If we met a stranger on the street, we would not freely open the door to our home where our family lives. Not where our wife, daughters or sons sleep safely at night, especially if we had a suspicion that this stranger might not be what he makes himself out to be, would we? Regardless of the need of this stranger, my first responsibility is to provide for my own house--not just their food and shelter--but the security, peace of mind and liberty of my own family. My first duty is to my own, that is the first duty of this county, this state and this country--duty first to our own. If we don't do that, we are worse than an infidel, so says the scriptures.

Muslims, even when they have created the appearance of assimilation and commonality, are creating Terror Zones and will create a battle Zone if we allow them. Elected officials have a duty to secure the lives and Liberties of the people they serve, Not by taking or restricting our liberties and making us defenseless, but rather first by securing the integrity of the borders of our country, our state, and our communities. The integrity of a sovereign state or country is secured by erecting barriers or making a determined stance to STOP potential danger from freely entering or being forced by wrongheaded policies directed from Washington, DC--what is often called the District of criminals--or the statehouse in Columbia!

Islam has proven what it is in the Middle East, in Europe and even here in America. How many have to suffer injury or die before those we chose to guard the security and lives of our people guarantee the security of a free society? Do 130 have to die? Or 65? Or 14? How many? We know that One is too many. Let us pray it is not our own!

We have communicated about this issue, some saying it is the governors duty, to which I agree. Yet, the governor has put the burden off on the County government. Since that be the case, with the evidence readily apparent in the last several weeks of this fall, proclaim the decision that as

representatives of the people, the County Council declares NO MUSLIMS! NO MUSLIM refugees, no Muslim immigration, no exchanges, FROM ANYWHERE IN THE WORLD, not into this county! Not just Syrians, which are less than two percent, but ALL Muslims.

I am calling on the Governor and this county council to Act Now before anyone else in America or this county is injured or killed by Muslims. We cannot allow wrongheaded Politically correct Policies from Congress or a Governor approved invasion of our land by those who hate us, call us the "great satan" or who want to hurt us and our children. Let's face reality: not all people and not all religious beliefs are equal. An old adage goes: fool me once, shame on you, fool me twice, shame on me. Lets don't be foolish, but rather wise, acting like a prudent man who, seeing the danger averts it before it causes damage.

Standing up for the people, I am,

Sincerely,

Michael Reed
