Please Governor, please help us to save our jobs. We are down to 10 days or less and you are still letting Mr Carter make the decisions. Please be the Governor of the people and step in to save our plant. We are not asking for a free ride, just the allowance to get power into our plant at a reasonable price. I have contacted the national news programs and asked for their help as well. The New York Governor thought enough of their residence to step in to save their job. Why oh Why can't you do the same.

Save Mt Holly for the 600 people that are employed.

Thank you, Lanita Coley
