Commission Approval of the 1997-98 Appropriations Budget Submittal

As discussed in the Commission Workshop in August, before the next fiscal years appropriation budget is submitted to the State Budget & Control Board, the Commission must approve the submittal. The deadline for submittal is the first week in October.

As you can see from the budget summary below, the appropriations budget each year anticipates certain revenue increases that may be enacted by the legislature in our current fiscal year. The DOT's normal process is to look at a more current revenue projection near the end of the legislative session and revise the appropriations budget to our actual operational budget based on the new revenue projection plus available cash balance to fund it.

In the 96-97 appropriations budget, we submitted costs based on needs that would result in a \$44.5 million deficit (leaving a highway fund balance of \$45 million) in the anticipation that additional revenues would be forthcoming (one cent to the counties, etc.). To arrive at our current operations budget (showing no additional revenue), we went through an internal budget cut in all areas but still added the additional cost of the 50/50 paving program with the CTC's to maintenance. The result is that we anticipate a deficit of \$34 million with a highway fund balance at the end of this fiscal year of \$55 million. Management feels we can take this one time deficit to lower our cash balance based on the precept that \$55 million is sufficient to handle our cash turnover without the agency getting into temporary cash shortages for operations.

In the 1997-98 appropriations budget, we are proposing costs based on current needs that will result in a \$42 million deficit without additional revenue increases during the upcoming legislative session. As you can see, this would leave a highway fund cash balance of \$13 million. Should there be no revenue increases, the department will be forced to reduce the operating budget by \$41 million to balance receipts and expenditures.
