TITLE: Shem Creek Bridge Bike Lanes, Pelzer Drive to Mill Street, Town of Mount Pleasant, Charleston County, South Carolina.

BRIDGE ID: 1040070300200

ASSET ID: 1348

CONSULTANT: Brockington and Associates, Inc. (Brockington)

DATE OF RESEARCH: 2019

ARCHAEOLOGIST: David Baluha

HISTORIAN: Lannie Kittrell

COUNTY: Charleston

DESCRIPTION: The Town of Mount Pleasant (Town) proposes to restripe an approximately 0.25-mile corridor along Coleman Boulevard (SC 703) at Shem Creek Bridge in Charleston County, South Carolina. The purpose of the proposed project is to improve bicycle and pedestrian travel along the street by providing connectivity and continuity with the existing bicycle and pedestrian lanes on either side of this project area, along the Coleman Boulevard corridor where it crosses Shem Creek. Specifically, using most of the existing curb lines, bike lanes will be added in both directions along the project corridor. Sidewalks are also proposed to be installed along the project limits in areas where the curb line is being changed. The addition and upgrade of these facilities will improve safety for all modes of transportation and enhance the appeal of the area. Figure 1 presents the location of the project. Figures 2 and 3 present the project location and nearby cultural resources on the United States Geological Survey ([USGS] 1980 and 2000) *Fort Moultrie, SC* and *Charleston, SC* quadrangle maps and on 2017 aerial imagery.

The Area of Potential Effect (APE) includes the archaeological and architectural survey universes. The archaeological survey universe includes the proposed project footprint, which extends approximately 406 meters along Coleman Boulevard between Mill Street to the south and Pelzer Drive to the north, approximately 22.9 meters (75 feet) east and west of Coleman Boulevard, covering 1.83 hectares (4.82 acres). The architectural survey universe extends 91 meters (300 feet) beyond the archaeological survey universe in all directions, encompassing approximately 12.60 hectares (31.00 acres).

LOCATION: The APE is located along Coleman Boulevard in the Town of Mount Pleasant, Charleston County, from Mill Street to Pelzer Drive. The APE extends southeast and northwest approximately 200 meters north and south of the Coleman Boulevard bridge over Shem Creek.

USGS QUADRANGLES: *Charleston, SC* and *Fort Moultrie, SC*

DATES: 2000, 1980 **SCALE:** 7.5' **UTM:** **ZONE:** 17 **DATUM:** NAD27

NORTHWESTERN TERMINUS: **EASTING:** 604657 **NORTHING:** 3628873

SOUTHEASTERN TERMINUS: **EASTING:** 604933 **NORTHING:** 3628568

ENVIRONMENTAL SETTING: The project is in the Town of Mount Pleasant on the southern tip of the Wando Neck, which overlooks Charleston Harbor. The area is in the Sea Islands/Coastal Marsh Level IV ecoregion (Griffith et al. 2002). According to Griffith et al. (2002), the Sea Island/Coastal Marsh ecoregion:

contains the lowest elevations in South Carolina and is a highly dynamic environment affected by ocean wave, wind, and river action. Quaternary unconsolidated sand, silt, and clay has been laid down as beach, dune, barrier beach, saline marsh, terrace, and nearshore marine deposits. Mostly sandy soils are found on the barrier islands, while organic and clayey soils often occur in the freshwater, brackish, and salt marshes. Maritime forests of live oak, red cedar, slash pine, and cabbage palmetto grow on parts of the sea islands, and various species of cordgrass, saltgrass, and rushes are dominant in the marshes.

The project spans Shem Creek, an estuary that drains southwest into Charleston Harbor. In the APE, elevations range from sea level to 3.1 meters above mean sea level (amsl). Shem Creek along Coleman Boulevard is heavily

commercialized, with very little to no undisturbed lands. The only vegetation consists of landscaping. Figure 4 provides views of the project setting.

NEAREST RIVER/STREAM AND DISTANCE: Shem Creek (0 meters)

SOIL TYPES: Tidal marsh, soft; Urban land-Yauhannah-Yemassee-Ogeechee association; Wando loamy fine sand, 0 to 6 percent slopes.

REFERENCE FOR SOIL INFORMATION: California Soil Resource Lab (2008) Streaming, seamless interface to USDA-NCSS SSURGO and STATSGO Soil Survey Products. <http://casoilresource.lawr.ucdavis.edu>, accessed September 11, 2019.

GROUND SURFACE VISIBILITY: 0% ☐ 1-25% ☒ 26-50% ☐ 51-75% ☐ 76-100% ☐

CURRENT VEGETATION: Landscaping, including ornamental flowers, shrubs, and trees, with some grassy areas.

INVESTIGATION: On August 27, 2019, Lannie Kittrell, the project architectural historian, consulted the ArchSite program to determine if previously identified cultural resources or previous investigations are in the project vicinity. These efforts identified five previous investigations (Bailey and Philips 2015; Dobrasko 2005; Pope et al. 2012; Trinkley and Fick 2000; Wagoner and Moore 2010), seven archaeological sites, 19 historic resources, and one National Register of Historic Places (NRHP) historic district. Tables 1 and 2 list the previously recorded archaeological sites and architectural resources within 0.8 kilometer (0.5 mile) of the APE, respectively.

Table 1. Previously identified archaeological sites within 0.8 kilometer (0.5 mile) of the APE.

Site	Description	NRHP Status	Reference
38CH0004	18th century scatter under Burn house	Not evaluated	Site form
38CH0268	18 th century <i>Aculus</i> shipwreck off Haddrell's Point	Not evaluated	Site form
38CH1004	19th-20th century domestic scatter	Not Eligible	Site form
38CH1788	Civil War battery (33 Haddrell's Point)	Eligible	Trinkley and Fick 2000
38CH2384	Late Archaic ceramic scatter; 19th-20th century domestic scatter	Not Eligible	Pope et al. 2012
38CH2385	Unknown Pre-Contact ceramic scatter; 20th century domestic scatter	Not Eligible	Pope et al. 2012
38CH2386	20th century domestic scatter	Not Eligible	Pope et al. 2012

The NRHP-listed Mount Pleasant Historic District is within 0.8 kilometer (0.5 mile) of the APE. This district was listed in 1973 and spans 30 blocks, bounded by Charleston Harbor to the west, Shem Creek to the north, Royal Avenue to the east, and McCants Drive to the south. The district is recognized for its important architectural styles and historic functions including domestic, religious, military, transportation, and commercial purposes (Ruhf 1972). The proposed project is in a heavily developed area and will not have an adverse effect on the Mount Pleasant Historic District.

In 1988, Chicora Research Foundation, Inc., conducted archaeological testing at 38CH1004, the site of the Mount Pleasant Presbyterian Church (built circa 1847). The church is a contributing element of the Mount Pleasant Historic District. Site 38CH1004 dates to the nineteenth and twentieth centuries and is directly related to the church; no NRHP assessment was made for the site. The site is approximately 230 meters southeast of the APE. The proposed project will have no adverse effect on 38CH1004.

Trinkley and Fick (2000) identified 38CH1788, the remnants of a Civil War battery (33 Haddrell's Point Battery). Located at 223 Bennett Street, the site is approximately 450 meters southeast of the APE. Despite being disturbed by residential development, Trinkley and Fick (2000) recommend additional work at 38CH1788. The proposed project will have no adverse effect on 38CH1788.

Table 2. Previously identified architectural resources within 0.8 kilometer (0.5 mile) of the APE.

Resource Number/Name		Address/Location	Date	NRHP Status	Reference

Mount Pleasant Historic District		Bounded by Charleston Harbor, Shem Creek, Royal Avenue, and McCants Drive	c. 1776	Listed	
SC 703 over Shem Creek		over Shem Creek	1947; 1958	Not Eligible	Transsystems 2015

During the Charleston County's School Equalization Program, 1951-1955, (Dobrasko 2005) Moultrie High (4273) was recorded. This resource is not eligible for the NRHP and warrants no further management consideration.

During the *Historic Resources Survey of the Old Village Historic District*, Wagoner and Moore (2010) documented resources within the NRHP-listed Mount Pleasant Historic District and resources within the 37-block, locally designated Old Village Historic District in the Town of Mount Pleasant. Wagoner and Moore (2010) identified approximately 430 historic resources within the study area. Wagoner and Moore (2010) was not submitted for agency review and the project boundary is not shown on ArchSite. None of these resources are in the APE, but all are within 0.8 kilometer (0.5 mile) of the APE. See Figure 5 for a map of the Mount Pleasant Historic District and Appendix A for the contributing and non-contributing resources within the Mount Pleasant Historic District recorded by Wagoner and Moore (2010).

During the *Phase I Cultural Resources Survey of the Proposed Coleman Boulevard Improvements*, Pope, Stevens, and Ciomek (2012) identified three archaeological sites (38CH2384-38CH2386) and 17 historic resources (Resources 6317-6321, 6322, 6326-6334, 6318, Shem Drive/Vincent Drive Neighborhood, and Lucas/Scott/Simmons Street neighborhood) within 0.8 kilometer (0.5 mile) of the APE. All 17 of these cultural resources are not eligible for the NRHP.

In 2015, Brockington conducted an intensive cultural resources survey of the Lucas Point Tract, a 0.5 hectare (1.2 acre) proposed subdivision. No new cultural resources were identified.

Additionally, SC 703 over Shem Creek was identified in SCDOT's Historic Bridge Survey as a 10-span, 310-foot long, T-beam bridge that spans Shem Creek in Mount Pleasant. The T-beam bridge has a concrete deck, standard concrete one-bar railings with tubular handrails, and is supported on reinforced concrete bents. The bridge was built 30 feet wide in 1947, with four lines of T-beams. In 1958, it was widened to 66 feet with three lines of beams to each side. Additionally, in 1958, the original two-rail-high concrete railings were replaced with the present railings (Transystems 2015). See Figure 6 for current views of the bridge over Shem Creek. According to the Historic Bridge Survey, the bridge is an altered example of one of the most frequently used state highway department standard designs. It is not historically or technologically significant and is not eligible for listing in the NRHP (Transystems 2015). The proposed project will have no effect on this resource.

ARCHITECTURAL SURVEY: Brockington architectural historian Lannie Kittrell conducted the intensive architectural survey on August 28, 2019. The architectural investigations consisted of a windshield survey to identify any potential historic architectural resources in the architectural survey universe. The architectural historian identified and recorded seven historic architectural resources (Resources 8001-8006) during the architectural survey. The resources are discussed below and listed in Table 3; Statewide Survey of Historic Properties Forms are attached as Appendix B.

Table 3. Newly Recorded Architectural Resources within the architectural survey universe.

Resource Number	Resource Name	Address	City	State	Date	Eligibility Status	Determination of Effects
8001	505 Pelzer Drive	505 Pelzer Drive	Mount Pleasant	SC	1966	Not eligible	No Effect
8002	504 Pelzer Drive	504 Pelzer Drive	Mount Pleasant	SC	1965	Not eligible	No Effect
8003	Renaissance South Construction Company	220 Coleman Boulevard	Mount Pleasant	SC	ca. 1900	Not eligible	No Effect
8004	Red's Icehouse	98 Church Street	Mount Pleasant	SC	ca. 1970	Not eligible	No Effect
8005	Tavern and Table	100 Church Street	Mount Pleasant	SC	ca. 1970	Not eligible	No Effect
8005.01	Tavern and Table lighthouse		Mount Pleasant	SC	ca. 1970	Not eligible	No Effect
8006	Elizabeth Stuart Design	215 Coleman Boulevard	Mount Pleasant	SC	1968	Not eligible	No Effect

Resource 8001 (505 Pelzer Drive). Resource 8001 at 505 Pelzer Drive (Charleston County Tax ID# 5170700016) is a one-story Ranch house constructed in 1966 in the Cooper Estates subdivision. This wood frame, brick veneered dwelling features a lateral gable roof and large central-protruding, front-facing gable portion that includes the engaged front entry. The foundation is obscured by the brick veneer but is most likely poured concrete slab foundation. Windows are wood frame, double-hung sash windows. The roof is clad in asphalt shingle, the exterior is clad in blond brick, and the front-facing gable is clad in horizontal synthetic siding. There is a bay window on the front façade that features a picture window and double-hung wood sash windows on either side, all with a diamond-shape window pattern. The front entry is within the engaged front porch that is supported on the southeastern corner with wood turned porch supports. Figure 7 presents a view of Resource 8001.

There are no people or events associated with this resource that would suggest the resource is eligible for the NRHP under Criteria A (people) or B (events). The Ranch house dwelling is a common type and style in the region and is not eligible under Criterion C (architecture). It has a good degree of integrity. There is no known potential for the resource to qualify under Criterion D (archaeology). Resource 8001 is recommended not eligible for listing in the NRHP.

Resource 8002 (504 Pelzer Drive). Resource 8002 at 504 Pelzer Drive (Charleston County Tax ID# 5170700002) is a two-story Ranch house constructed in 1965 in the Millwood subdivision. The wood frame, brick veneered dwelling features a lateral gable roof on the western two-thirds, two-story portion of the house, and a lateral gable roof on the eastern one-third, one-story portion of the house. The roof is clad in asphalt shingle. The first story is clad in brick veneer and the second story is clad in horizontal synthetic siding. All exterior cladding is painted white. A shed-roof central entrance, accessed via a brick staircase, features an entry with replacement doors. The attached garage is on the eastern one-story portion of the house. Windows are replacement windows. A large fixed replacement tripartite picture window is also on the front façade. The foundation is obscured by the brick veneer but is most likely poured concrete slab foundation. Figure 8 presents a view of Resource 8002.

There are no people or events associated with this resource that would suggest the resource is eligible for the NRHP under Criteria A (people) or B (events). The Ranch house dwelling is a common type and style in the region and is not eligible under Criterion C (architecture). It has a medium degree of integrity due to numerous exterior alterations. There is no known potential for the resource to qualify under Criterion D (archaeology). Resource 8002 is recommended not eligible for listing in the NRHP.

Resource 8003 (220 Coleman Boulevard). Resource 8003 at 220 Coleman Boulevard (Charleston County Tax ID# 5171600068) is a ca. 1900, two-story Charleston single house in the Lucasville subdivision that currently functions as an office. The dwelling may date to the early twentieth century, but according to historic aerials it does not appear in this location until 1989. Therefore, the building may have been moved here prior to 1989. The wood frame dwelling features a front-facing gable roof on the main two-story house, the two-story rear addition, and a one-story rear porch addition. The dwelling is one room wide and includes a piazza entry and a one-story, shed-roof porch on the south façade. The roof is clad in standing seam metal and the exterior of the entire dwelling is clad in synthetic siding. The foundation is concrete block. The entry is on the side of the house, accessed through the piazza entrance door or via a staircase on the porch. Windows are wood-frame, double-hung, wood sash windows. There is only one window on the north elevation. Figure 9 presents a view of Resource 8003.

There are no people or events associated with this resource that would suggest the resource is eligible for the NRHP under Criteria A (people) or B (events). The Charleston single house is a common type and style in the region and is not eligible under Criterion C (architecture). It has a good degree of integrity. There is no known potential for the resource to qualify under Criterion D (archaeology). Resource 8003 is recommended not eligible for listing in the NRHP.

Resource 8004 (98 Church Street). Resource 8004 at 98 Church Street (Charleston County Tax ID# 5171500001) is a one-story lateral gable roof commercial building constructed ca. 1970 in the Lucasville subdivision. The building, which currently houses Red's Icehouse restaurant, is situated with the gable end facing Shem Creek. The wood frame building is clad in weatherboard siding and standing seam metal. The roof is clad in standing seam metal. The foundation is not visible but is likely slab construction on land and wood pier on the deck on Shem Creek. Windows are various wood-frame, wood-sash windows. Additions include a two-story deck and an additional attached building on the north side of the original building. Figure 10 presents a view of Resource 8004.

There are no people or events associated with this resource that would suggest the resource is eligible for the NRHP under Criteria A (people) or B (events). The vernacular commercial building is a not an outstanding representative example of a type, period, or method of construction, and thus is not eligible under Criterion C (architecture). It has a medium degree of integrity, due to exterior alterations and additions. There is no known potential for the resource to qualify under Criterion D (archaeology). Resource 8004 is recommended not eligible for listing in the NRHP.

Resource 8005 and 8005.01 (100 Church Street). Resource 8005 at 100 Church Street (Charleston County Tax ID# 5171500001) is a one-story lateral gable roof commercial building constructed ca. 1970 in the Lucasville subdivision. The building, which currently houses Tavern & Table restaurant, faces Shem Creek with the gable ends parallel to the creek. The wood frame building is clad in weatherboard siding and the roof is clad in asphalt shingle. The foundation is wooden beams and there is a grand wooden staircase at the entrance on the west elevation. Windows are various wood-frame, wood-sash windows. Resource 8005.01 is a non-functioning lighthouse, also ca. 1970, situated adjacent to the building's northeast corner. Figure 11 presents views of Resources 8005 and 8005.01.

There are no people or events associated with this resource that would suggest the resource is eligible for the NRHP under Criteria A (people) or B (events). The vernacular commercial building is not an outstanding representative example of a type, period, or method of construction, and thus is not eligible under Criterion C (architecture). It has a medium degree of integrity, due to exterior alterations and additions. There is no known potential for the resource to qualify under Criterion D (archaeology). Resources 8005 and 8005.01 are recommended not eligible for listing in the NRHP.

Resource 8006 (215 Coleman Boulevard). Resource 8006 at 215 Coleman Boulevard (Charleston County Tax ID# 5171500095) is a one-story vernacular commercial building constructed in 1968 in the Lucasville subdivision. The building, which currently houses Elizabeth Stuart Design, consists of a lateral gable-roof main building at the rear and a large, low-pitched, front-facing, gable-roof canopy addition at the front façade. The wood frame building faces Coleman Boulevard. The rear portion of the building is concrete block, partially clad in weatherboard siding with asphalt shingle roofing and garage doors on the west. The front portion of the building is clad in corrugated metal on the east and features a standing seam metal roof. The front façade features a central glass front entry under the metal canopy. The foundation is not visible but is likely concrete slab. Figure 12 presents views of Resource 8006.

There are no people or events associated with this resource that would suggest the resource is eligible for the NRHP under Criteria A (people) or B (events). The vernacular commercial building is not an outstanding representative example of a type, period, or method of construction, and is thus not eligible under Criterion C (architecture). It has a medium degree of integrity, due to exterior additions. There is no known potential for the resource to qualify under Criterion D (archaeology). Resource 8006 is recommended not eligible for listing in the NRHP.

ARCHAEOLOGICAL SURVEY: Brockington archaeologist David Baluha conducted the archaeological survey on September 2, 2019. Archaeological survey consisted of visually inspecting undeveloped upland portions of the archaeological survey universe. Investigators traversed two (2) pedestrian transects along the northeastern side of Coleman Boulevard. This includes approximately 110 meters between Shem Creek and Mill Street and 70 meters between Shem Creek and Pelzer Drive. Shovel tests were excavated at 30-meter intervals along each of these transects. The ground surface of the entire shovel test transects was visually inspected.

Archaeologists excavated a total of six (6) shovel tests during the survey. The fill from these tests was sifted through ¼-inch mesh hardware cloth. Investigators excavated shovel tests to an average depth of 60 centimeters (cm) below surface (bs), ranging from 20 to 80 cmbs in depth. Shovel tests excavated between Shem Creek and Pelzer Drive displayed Wando loamy fine sand, while shovel tests excavated between Shem Creek and Mill Street displayed Urban land (California Soil Resource Lab 2008). Wando loamy sand displays a typical soil profile consisting of 0-20 cm of brown (10YR 4/3) fine sand and 20-80 cm of strong brown (7.5YR 5/8) fine sand. No new archaeological resources were identified.

REMARKS AND RECOMMENDATIONS: These investigations identified seven architectural resources (Resources 8001-8006) in the APE. We recommend Resources 8001-8006 not eligible for the NRHP; these resources require no management consideration. As currently designed, the proposed project is adjacent to the NRHP-listed Mount Pleasant Historic District. However, the proposed project is in a heavily commercialized area of Mount Pleasant and will have no adverse effect on the Mount Pleasant Historic District. If the current design is altered to include lands outside the current APE, additional survey may be necessary.
