

June 6/16

Dear Governor Haley,
about this traffic congestion. What if one made a suggestion that all that want to, leave for their destination an hr. early. It makes for less stress & aggravation.

Plus you can relax at your job a little while before you start. Have a coffee. you will have a much better day.

I thank you,

Mike Panda

10/1/19

1. The first part of the rock
is a thin layer of
limestone. It is very hard
and breaks into small pieces.
The second part is a
thick layer of sandstone.
It is very soft and breaks
into large pieces. The third
part is a thin layer of
shale. It is very soft and
breaks into small pieces.
The fourth part is a
thick layer of sandstone.
It is very soft and breaks
into large pieces. The fifth
part is a thin layer of
shale. It is very soft and
breaks into small pieces.
