Subject: cost savings

I think that if there was a way to have all policies that I have acknowledged on the intranet. We are wasting a lot of paper even though I use recycled paper.

Another cost savings idea: Due to the heavy traffic of this office lock the doors at 4:45 on Monday and Friday. This would allow for all customers to be serviced by 5:00 and all "end of the day" items to be completed so as to have all employees out by 5:15. This would keep this office from getting comp time.

Question of concern*

What are the chances of getting a time clock or having our time documented by Phoenix as to when we log on?
