Hello, I'm sure you may get many messages, but hopefully someone will see/reply to this one. I just submitted two photos to the Spring Photo Contest, but for some reason, they both uploaded sideways instead of how I have them on my drive. Also, I no longer see them in the gallery and wanted to share the link on my Facebook page. I don't want to violate the contest by uploading the same photo twice, but if an error occurred, I would be glad to resubmit them! (If it helps, mine were both for Edisto State Beach. One was a laughing gull reflecting on wet sand, and the other was a ring-billed gull on the shell mounds). Please let me know what I should do! Thank you!

Jennifer,  
All photos have to be approved before they will be shown in the gallery, so they will show up in the next day or so. We can rotate them for you before we approve them so they will appear correctly. Please let us know if you have any more questions and thanks for your entry!
