**Subject:** Mercedes and Volvo

I love celebrating that we now build things in South Carolina. We build planes with Boeing. We now have 5 international tire companies. We just broke ground yesterday with the largest producer of carbon fiber in the world, Toray, who will now call Moore, South Carolina home. We are the BMW capital of the world producing more BMWs than any other plant in the world. Well this past year our South Carolina family continued to grow and we will now be building more automobiles than ever before.

We are proud to announce that Mercedes Benz will now be manufacturing Sprinter and xxx vans in South Carolina. These custom vans are developed for freight transport or for executive purposes, with swivel chairs, cup warmers and coolers, and more options than you can imagine. These are the coolest vans I have ever seen. We want every company across South Carolina and the country to buy these American made vans. Please help me welcome xxxxx and xxxx as we give our total support to Mercedes Benz.

In (month), I along with Sec. Bobby Hitt and our teams sat in the mansion library with Gov. Carroll Campbell's portrait looking over us. we took a long awaited call that Volvo Cars had chosen to partner with South Carolina to begin their journey of making cars in America. Volvo is known for its reputation of safety and quality. We are proud that they have invested and trust our workforce of South Carolina to deliver on this front. To our friends at Volvo, I have total faith in our workforce, we won't let you down. Please help me thank and welcome xxxx and xxxx of Volvo Cars.

It is a Great day in South Carolina when we can say we are now home to BMW, Mercedes Benz and Volvo Cars!
