Message:

every year our tax rebate has been taken by the Greenville hospital system for a bill. This happens even when I have set up payments and was paying on it. the bill was in my daughters name and I set up payments and they still took her tax refund. I have been paying back a refund that the state said was given by mistake. Last year when we got our taxes done it showed we were suppose to get a 630. refund. Which if we still owed I don't see how. but still the state ok it and in stead of it coming off of what I was paying the Greenville hospital system took it. This is a year after year thing. I would like to know how the hospital out ranks the state when it comes to taking your taxes. Please help me to understand how they can keep doing this to us.
