at 22:50:15 on 7/23/2020 UTC

at 22:50:31 on 7/23/2020 UTC

Diana Guenther Lackey wondering same

at 22:51:12 on 7/23/2020 UTC

at 22:51:37 on 7/23/2020 UTC

Dana Vickery Only red

at 22:51:53 on 7/23/2020 UTC

Henry Smalley Because turtles use the light from the moon to help them navigate in the dark as well.

at 22:52:37 on 7/23/2020 UTC

Shona Taylor Boatwright Bonnie Pence the turtles will follow the lights away from the ocean

at 22:52:54 on 7/23/2020 UTC

Heather G Wilkerson Laurie Clark Wilkerson show Langston

at 22:53:09 on 7/23/2020 UTC

Judi Saylor How do you locate the nest?

at 22:53:28 on 7/23/2020 UTC

Chris Palmer turtles get confused with lights - they look for the moon or the sun. If they are looking to nest, they may go back out to sea. The hatchlings will follow the lights, and often that means going away from the ocean and into dunes or vegetation where they will likely die
