---

Dear Mr Tony Kester,

### ABOUT THE CONFERENCE:

Supported by **PAHO/WHO**, **BARDA**, **NIH** and big pharma, **Superbugs & Superdrugs USA** will bring together leading scientific pioneers and government bodies working in antimicrobial resistance, biodefense and infectious diseases.

It will strengthen knowledge in key topics such as, innovations to treating **gram-negative infections**, **novel protein** based biologics, industry **funding** and **combination** therapy, whilst looking at the potential of new drug discovery and keeping attendees at the forefront of clinical breakthroughs to fight the global attack against bacteria's defensive walls.

Check out the [new agenda](#) released today.

Understanding the **translational link** between animals and humans; targeting mechanisms to restore **antibiotic sensitivity**; and epidemic **preparedness** will be a major focus, as will hearing from a selection of biotech and pharma companies currently undertaking clinical research. This will include case studies from **AstraZeneca**, **Pfizer**, **Janssen** and **Zoetis**.

See the full [speaker line-up](#).

Highlights on the truly international program will include two interactive workshops and an exclusive European spotlight featuring keynotes from **Blueberry Therapeutics**, **ABAC Therapeutics** and **Destiny Pharma**.
