Can you try this:

Could be the browser version, or just the settings. I would first have them put the url into trusted sites and turn off pop up blocker for this domain.

Thanks,

Beth

OK, thanks – I can log-in without any problems, but don't seem to be able to do much else. For instance, if I try to click "Search" or "New" under either Base Budget Forms > Base Expense / Position Form or under Decision Packages > Governor's Request, then I just get the endlessly spinning blue/yellow circle. Josh has the same problem.

Is this a browser/compatibility view thing? We're both on IE10. Thanks.

You guys now have access in PBF in our QA environment. Feel free to play around. I would ask that you limit what you are doing to the agencies P160 or P240. We are still doing full cycle testing on some other agencies. The link is below. Your user name and password are the same as your MySCEmployee logons. Please let me know if you have access issues.
