

Dear Governor Haley,

My Name is Haesea Coffey, I live in Greenwood S.C. I'm writing on behalf of our war on Drugs, and our Judicial System Greenwood where I have resided in most of my life, I haven't noticed this problem till recently, I've noticed because I have loved ones incarcerated on drug related charges, I've always believed if you break the law you take your punishment. I also believe every criminal is different, some don't care, some like it, and some do care, they have an addiction, which is a disease and needs treatment to conquer and understand their behavior, so that they can be a productive member of society. So there for, they need what our court systems have to offer, and should offer, for those who need it and want it. We are sitting back and letting our law enforcement run our court Rooms, I was taught that

Law enforcement had there job, and the Court system had there jobs, so my question is why do we have a Judicial system if law enforcement can have the say to what sentences our inmates receive, and I'm seeing this time, and time, again, we have our law enforcement using and paying, switches, C.D.I., throwing warrants out from people who do not want to change, and are doing the same crime over and over again, and getting away with it, and these people are our worst offenders possible, that do deserve prison time because they don't want to change, but they get a get out of jail card, when ever possible, if I'm wrong please tell me how this is right in our society, that we can give the rights to certain individuals, to break the law any time they feel like it, and not have

to worry about our legal system. I'm sorry, but something big is really wrong with this picture, because in all reality law enforcement is letting C.D.I and snitches do their jobs for them, and paying them thru our judicial system, excuse me, but that really should be against the law, but our legal system says they have that right, well I don't think they should and I'm sure there are thousands of people that feel the same as I. I'm starting up a petition on this matter, and will do everything in my power to see that the laws change, no one I mean no one should be rewarded for breaking the law repeatedly, they should have to serve the same sentences as everyone else, no exceptions on top of that our court systems

are letting law enforcement
have say to what there
sentences should be, and
are getting it, and I'm seeing
it all the time, please explain
to me how this is right so
that I myself can make sense
of it, because right now all
I see is certain individuals
are breaking the law over and
over again and getting away
with it because our judicial
system is letting them.

I feel like if we don't
change the laws on C.D.I.
et, our country will suffer
from this and our war on
Drugs will only get worse
because you give certain rights
to C.D.I. et, to keep breaking
our drug laws and getting
away with it then our court
system our war on Drugs
would only be worse, if everyone
was treated equally then our court
system I truly believe our
war on Drugs would decline.

But as long as we keep
letting them make their
own laws as they go
Our war on drugs has ^{only} gotten
worse over the years, our
country is just sitting by and
letting it happen. I feel and
thousands of other people
feel the same way. It is
time for new laws on this
matter, I sincerely hope
you ~~see~~ this as big as a
problem as I do and thousands
more if we continue to sit by
and watch our war on drugs
will only get worse, as we are
seeing everyday. Please share
your feelings on this matter
I really would like to know
when you stand on this,

Teresa Coffey
206 Sicel Lee Rd.
Waterloo, SC, 29348
