Subject: RE: Question for the governor

Maybe not

I'm going to make both of our lives easier and retract that question. Upon further interviews and research, while the governor's input is always appreciated, it's not a productive line of questioning nor is it going to fit in with the scope of the story that I'm fleshing out here with our local voices.

Pardon for the interruption in your day and thanks again for your time,

Rachel

Subject: Question for the governor

Hi Doug,

Hope you're doing well and enjoying all the energy of this primary election day.

I had a quick question for Gov. Haley or her office regarding the passage of her education plan, based on an issue that's been brought up time and time again by local school board members and administrators during this budget cycle...

If education funding is such a priority to the governor, why is it that the legislature still hasn't fully funded the base student cost? Has she tried to make this a priority or does she foresee doing so in the future?

Thanks so much,

Rachel
