The state of South Carolina finally knows how many buildings and how much land it owns, after years of no one having any idea. Gov. Nikki Haley had issued an executive order for state agencies to compile the list, and it's finally finished.

What do we have that the taxpayers are paying for that's not even being used? So our hope is that we're going to start to clean all of this stuff up, make sure that we're being as efficient as possible and as smart as possible with the properties that we have."
