Willis Dorsey

SCDC Number: 222965

To whom it may concern,

I have several concerns I wanted to address to you about my husband who is currently serving his prison sentence at Lee Correctional. My concerns are he been putting in requests to obtain some assistance on getting a level of rehabilitation to help his self and his family. He been putting in requests over a year ago regarding his concerns and seeking help on getting into programs that can benefit him. He asked your staff for advice and seeking assistance and your staff give him unprofessionalism. Since he has been coming to the Department of Corrections, he have been in need of an outlet to better his self for the sake of the people that love him. Everyone at the Department of Corrections are looking at his past and not looking ahead of what he can do for his self to make his self-better. He wanted to enter into programs at the facility like drug rehab programs, second chance program, and also anger management programs. He is not a bad person, he just want to better his self. General population, when is he able to get back into general population again. He has been disciplinary free for a few months now, he need to be in general population and get some recreation for his knee. Medical attention, Mr. Dorsey put in his request for medical attention and did not get the proper medical assistance he need, we are concern about his health and we want to make sure he get the proper medical assistance he needs. Visitation, we are not getting our visits, I called to set an arrangement up but they told me only immediate family are welcome to visit him, I thought all inmates have their privileges back and I am his immediate family, I am his wife and I think it is not fair that they have me down as his wife but his friend.

Thanks,

Schneaka Moody Dorsey
