**Subject:** Re: Fw: Release - Some Additional Costs to Retirement Reform

---

This press release is amazing on many fronts. To name a few:  
The house conferees called it good legislation and never once brought up paying people as an issue. If I were a House Republican I would be incensed as the Speaker thru this release basically called me a lemming, a mindless little rodent if I voted for the bill.  
The Speaker also invites a lawsuit and a review of the credit rating. This is a strategy I have never before seen.  
I don't recall a more invective release. His feeling about our Repulican governor are obviously not positive.

In spite of what the Speaker says, you all did a great job

After months of hard work, this plan includes major reforms that directly address the retirement fund's \$14 billion unfunded liability and solutions that will make the fund solvent.

On Wednesday, armed with a PEBA endorsement letter from the Governor, the options proposed to the House were made very clear – include PEBA or watch retirement reform die.

As just one example, it is a totally new agency with 11 members who are required to meet once a month and are paid \$1,000 a month each.

With a ruling that indicated this was going to be the new standard for how our state’s Supreme Court addressed these types of cases from now on, the Governor and Senate are playing a game of constitutional Russian Roulette with our state employees’ retirement fund.

But if it can’t, Governor Haley and the Senate certainly cannot claim that they were not thoroughly warned about this possibility ahead of time.”
