---

No, that is our most recent public action. Hope to have more actions coming in the near future.

Another thing to note, and I can try and pull it for you once I get back to my desk, the FCC has reopened this issue since we sent them the letter. If I can get something public about that, could show how NRH is moving the ball. Would this be helpful?

David,

Have there been any updates here?

Hey! I am a reporter with WMBF News in Myrtle Beach. I emailed you a week or so ago to see if there has been any movement in the contraband cellphone action Gov. Haley is requesting. I interviewed her about the topic a month or so ago...and I just want to make sure what we talked about is still relevant. If it's not, then I won't use it. The last I saw though was the letter she signed with several other governors asking the FCC about cellphone jammers. I hope to hear back from you soon.  
Thanks!
