Ref: Many of the current laws are obsolete, unfair and need to be changed. Loud barking dogs.
3rd Attached letter with details dated 3-29-16—PUBLIC NUISANCE DOGS
cc: Greenwood County—Councilman Mark Allison—Sheriff Tony Davis—Zoning Manager
SC-Rep Ann Parks—Sen Floyd Nicholson-Some of these people should be able to help solve.

To: Governor Nikki Haley Ph: 1-803-734-2100 -State House Bldg 1st Floor
1205 Pendleton St. Columbia, SC 29201- Your help is needed. Thanks for your time.

Date: 6-18-16 4th Letter Absolutely Confidential Amendments are needed.
Subject: Information for your review and your action. Please help us. Your Attention is Needed.
These dogs are an annoying PUBLIC NUISANCE and they are violating the noise ordinances.
Dog owners need to realize that other people do not want to hear, smell, or see their dogs.
Dogs are a Safety and Health Hazard due to the disease carrying insects and odor they have.
Dogs also present the problem of hazardous waste disposal when living in neighborhoods.
These loud speakers in vehicles are a Public Nuisance. Other people do not need that noise.

Governor would you please have a meeting with the above listed people and discuss the issues as outlined in the attached letter. It seems to me that nobody is willing to realize the reality of these problems. In America and South Carolina many problems have been solved and objective progress has been made. However, the people in Government must realize the issues and discuss them. Currently dogs have more rights than people and something is wrong with this dilemma. I do not want to listen to stinking and loud barking dogs all day and night long. Also, I do not want to listen to these loud and useless automobile speakers going bump thump bump. Something should be done to protect the people who want peace, quiet and a respectful and intelligent neighborhood. I can not solve these problems without your help. I can only give you information.

I have listed a few of the achievements and changes that will demonstrate what can be done if problems are addressed in an objective and fair manner.

Minorities and women can vote and run for public office

Minorities and women can own property

It is illegal to discriminate against people due to age, race, color, religion, sex or national origin

The military draft was eliminated

Smoking is not allowed in public facilities such as restaurants and stores

People are required to wear seat belts when driving

State and Federal supported schools and colleges are integrated

Speed limits are set for the highways and roads

I can go on and on and include a great deal of detailed information. However I am just trying to get the lawmakers to see that these dogs and speakers are problems. These problems should be fixed now. Do not wait too late or for a disaster to happen. The longer you wait the more it will cost to fix. Amendments, New Laws, New Rules, Revisions and Reviews are in order because some of the current laws are obsolete for today's living status.

PLEASE HELP US, ONE CITIZEN CAN NOT SOLVE THIS.

Neighborhoods—Laws—Loud Barking Dogs-Litter-Noise Ordinances-Loud speakers

A lot of new rules, laws or amendments are needed for our neighborhoods. The biggest one observed is dog rules. Dogs and dog owners are very well protected and the rights of others are not protected. In my neighborhood the dogs are barking loud all day and all night long. This noise is truly a nuisance and it violates the noise ordinances. However current rules require a person to go to court and file a claim against the dog owners. This does not make any sense. The officers should be able to issue the dog owners a ticket for these noise violations.

If a person will call law enforcement people when the dogs are barking and the officers can see and hear the dogs, then the situation should be handled by the dog owners and the officers. The caller should not be required to get involved because the dogs do not belong to the caller. If the dogs owners were required to have anti-barking collars or mugs on theses loud dogs, this would help keep that annoying noise down. These dogs stink and carry germ carrying insects. The houses in this neighborhood are just too close to each other for dogs to be allowed. Space is very important for peace and privacy. This should be researched and reviewed for the dignity of having a peaceful and quiet neighborhood. This neighborhood smells and sounds like a jungle. Why do we have noise rules and the law enforcement people can not enforce them? I can not afford to go to court because of another person's dogs. I am a tax payer and I deserve the right to a peaceful, quiet and safe neighborhood. Dogs have disease carrying insects and they stink. Since I pay taxes I should not be required to listen to dogs barking loud all day and night. Having all these dogs in any neighborhood is a health hazard. These big dogs are not pets. Then some people will walk these loud and sinking dogs around the neighborhood. The dog owner should be required to keep those dogs in their own yard and stay out of the road. When these dogs are laying waste in other people's yards the owners are not picking it up. This is a double dose of clear unwanted mess and a nuisance of unsafe dog activities.

Please make a rule to stop these cars with extremely loud speakers from riding in neighborhoods. This noise is bump thump bump, it is not music. I believe those drivers are a safety risk. These trucks and cars are creating a sense of suspicious activity and behaviors of the drivers. Also a stronger enforcement of the littering rules should be reviewed. Cigarette butts are everywhere and the roads and neighborhood is full of bottles, paper, food containers and other trash items. Another group of young and older males are riding around and around the neighborhood on those loud and annoying motor cycles and dirt bikes. The neighborhood is not a bike track.

In addition fireworks should not be allowed in neighborhoods. This is just another case of noise violations. Those fire works sound just like real guns. Some children and some adults are playing in the road and this is a serious safety violation waiting for an accident. Then they start getting loud and cursing and throwing the balls and rocks in another person's yard. In summary these are the problems, loud barking dogs that are barking all day and night. People walking those stinking dogs around the neighborhood and allowing them to lay waste in the road and on other people's property. Loud speakers running in those suspicious looking vehicles. People playing and loitering in the road. Loud dirt and motor bikes roaming around. People shooting those loud fireworks that sound just like real gun fire and grenades. Hope you can help.
