We were excited to kick off [The Original Six Foundation](http://www.originalsixfoundation.com)'s new after school program today in Jonesville! The program encourages students to learn through hands on activities-- learning new technology skills based in science, technology, engineering and mathematics. Most importantly these students will receive help with their homework from actual teachers so they can feel organized and ready for school every day. The Original Six Foundation focuses on lifting up our rural areas. For more info please visit: [http:// www.originalsixfoundation.com](http://www.originalsixfoundation.com)
